"The free press is the leader of our society. The teacher of the masses is the teacher of the free press. He should be freed from the shackles of ill-informed public opinion. He is hindered in his task by the restrictions of former times impressed on him by a 19th-century agrarian society."

"The law is to read something and you can't understand it, you can be sure it was written by a lawyer. They..."
If you give it to another lawyer to read, he can't know just what it means; then you can be sure it was drawn by a lawyer. If it is in a few weeks and it is plain understandable, why one way it was written by a non-lawyer?

* Even though a lawyer wrote something, he is not writing for for the court; he's writing so another lawyer of his craft can make a living out of trying to figure out what he said. In some parts he didn't really need anything, that's what makes it hard to explain.

BASTIAT 12/2/1874

When the people are encouraged to turn to govt to solve all of their problems for them, the basis of all revolution is thereby established. For then the people expect the govt. to provide them with all the material things they want. And when these things are not forthcoming they resort to violence to get them. Why not, then, govt. itself has told them that these irresponsibly belong to govt. rather than to them? I am convinced that the use would not be possible, if the only relation between govt. and people was to guarantee them their

Quot: Dr. Alex Fraser Tytler on Athens - U.S. Pres 50 Yes. Ago.

"A Union cannot exist as a form of govt. It can only exist until the voices discovered they can vote themselves charged out of the public treasury. From that moment on the majority always votes for the cause, promising the most benefits from the public treasury with the result that union always collapses ever a brutal policy always to be followed by a dictatorship." It can be said that even in our current state of economic growth, through the rise of emerging economies like China and India, the global economy remains in flux. With the end of the 20th century and the beginning of the 21st, we are witnessing the emergence of new economic powers and the growing importance of emerging markets. The new economic landscape is characterized by increased globalization and the rise of emerging economies, which has led to a new economic order. This order is marked by increased interdependence, with emerging powers playing a significant role. The result could be a new age of predictability. The change to the new world is not a mere rearrangement. The change is a realignment of the world in a lack of unity or cohesion to be felt for another 200 yrs.

In my opinion the danger of dangers to the future of this country yet we be sure we keep it always within its limits. If this great ambition, they ever grow too fast it will be oppressed. The statesman who should attempt to direct private fortune in what manner they ought to employ their capital would not only load himself with a most unnecessary caution, but assume an authority which could be safely bestowed, not only on no single person but on no council or body, whatever and which would moreover be so dangerous as in the hands of a man who had the gold.
