ITINERARY IN THE UK  
MONDAY, 6 APRIL

- 0900 - Depart London/RAF Northolt (UK military air). Nott and his private secretary will accompany you throughout the day and fly with you to Bonn.
- 0945 - Arrive RAF Cottesmore; observe Tornado Trinational Training Establishment flying demonstration and visit with pilots.
- 1115 - Depart RAF Cottesmore
- 1145 - Arrive RAF Lakenheath, home of USAF 48th Tactical Fighter Wing. Meet with Major General Robert W. Bazley, USAF, Commander Third Air Force, and visit with his troops.
- LUNCH
- 1430 - Depart RAF Lakenheath for Bonn

Overview for Your Meeting

with

UK MOD John Nott

(6 April 1981)

In view of your recent meetings with Prime Minister Thatcher and MOD Nott, the British do not believe there need be any issue agenda. We agree, but believe you could take advantage of Nott's company to probe him on two issues:

(C) Southwest Asia

- Ask for a read out on his just completed trip to the Persian Gulf.

(C) UK Defense Effort

- Ask his thinking on matching the UK's defense budget resources with roles, missions, and tasks.

(Attached per your instruction: US/UK Cooperation on TRIDENT), TAB 1  
UK Defense Spending, TAB 2  
TORNADO, TAB 3

MEMORANDUM FOR THE SECRETARY OF DEFENSE  
DEPUTY SECRETARY OF DEFENSE

SUBJECT: U.S./UK Cooperation on TRIDENT - INFORMATION MEMORANDUM

At your 11 March 1981 meeting with the UK MOD and other British defence representatives, you reaffirmed our commitment to make available to the UK whatever TRIDENT missile option we select as a follow-on to the TRIDENT I (C-4) missile. You also agreed, within the bounds of practicability, to afford them the use of U.S. storage and rework facilities as a fallback. The British representatives at the meeting noted that they have a near term problem regarding the obligation of funds for their TRIDENT program. You requested a paper on the relevant background material.

The attached paper discusses the requirements of the UK defence process in the near future as they apply to the obligation of funds for their TRIDENT program, as well as the impact of U.S. TRIDENT I follow-on decisions on UK TRIDENT program decisions.

Signed: J. P. Wade, Jr.

REF 813143

(U) Near term United Kingdom problems relative to obligation of funds for the U.K. Trident program relate to procurement of parts and components of the Trident I (C-4) missile and guidance system well in advance of missile procurement. These problems exist primarily because of the uncertainties about future U.S. SLBM decisions and their potential impact on the U.K. strategic program. The U.S. is presently pursuing a three year Advanced Development Program for the Submarine Launched Ballistic Missile Program which protects three missile options. The options are: an improved accuracy Trident I (C-4) which is referred to as the C4U; a version of the C4U which provides increased range protection by adding a new and longer first stage which is referred to as C4L; and the Trident II (D-5) which is an all new missile that will maximize the use of the volume in the Trident SSBN launch tube to improve range and payload flexibility along with increased accuracy. Present plans are to select one of these options for development and production prior to the end of FY 1983.

(U) Since ballistic missiles cannot be tested adequately without expenditure through flight tests, reliability of the system depends on producing, as nearly as possible, missiles identical to those designed, tested and qualified in the development flights. In the Trident I program many missile and guidance piece parts, components and materials are being procured in advance of missile fabrication needs on continuous production lines at an optimum rate for quality to assure that the parts are identical to those qualified in the development program.

(U) Since some of the U.S. piece parts, component and material production lines begin to close in FY 1981, the U.K. has been and will continue providing funding to procure parts, components and materials to the same quality standards to assure equivalent reliability for U.K. missiles and guidance systems. Our SLBM Modernization Program is funded at a level to proceed, at a minimum, with an improved accuracy Trident I (C4U) program. This decision accelerates the closing of certain guidance dedicated production lines. Therefore, the U.K. has been asked to accelerate its near term funding to protect future U.K. procurement of Trident I guidance systems. The U.S. is already proceeding with contract actions in the amount of \$38.4 million for advanced funding of the U.K. program. With the U.K. currently committed to C-4 and the U.S. to (at least) C4U, U.K. funding requirements for the next two years to preserve the C-4 option consist of the following (\$ in millions):

<u>In Process</u>	<u>4/81</u>	<u>11/81</u>	<u>2/82</u>	<u>4/82</u>	<u>11/82</u>	<u>2/83</u>	<u>TOTAL</u>
38.4	18.9	24.9	46.4	29.1	24.3	45.6	227.6

For this and for all funding profiles that follow, the figures address only advance procurement requirements and not the total U.K. investment in the Trident system during the period. It should be noted that the above dates reflect required contract coverage; however, U.K. authorization requires ministerial approval, an administrative decision point, which must precede contract award by as much as eight months.

(U) The United Kingdom perceives the potential for near term cost avoidance. However, this potential is dependent upon both U.S. and U.K. decisions. Specifically, the U.S. must decide on its follow-on missile system and its willingness

NARA DATE 7/31/13

to make the system available to the U.K. The U.K. must, in turn, decide if it will procure that system. The potential near term savings are further dependent upon the timing of both U.S. and U.K. decisions.

Should the U.S. decide to proceed with Trident II the following options could be made available to the U.K. at that point:

a. (U) Proceed with C-4 as new procurement.

b. (U) Proceed with C-4 assuming purchase of excess U.S. missile and guidance system assets following the U.S. retirement of previously deployed C-4 (and replacement with D-5).

c. (U) Follow the U.S. to Trident II (D-5).

1. (U) For option a. the U.K. funding profile in the near term is estimated as follows (\$ in millions):

<u>In Process</u>	<u>4/81</u>	<u>11/81</u>	<u>2/82</u>	<u>4/82</u>	<u>11/82</u>	<u>2/83</u>	<u>TOTAL</u>
38.4	12.6	31.0	81.4	23.6	24.3	45.6	256.9

This profile reflects an acceleration of near term costs to retain production lines the U.S. would otherwise close down, amounting to approximately \$30 million.

Additionally the U.K. could expect further cost accelerations beyond FY 1983 for similar reasons. Given a U.K. decision to remain with C-4, this option permits the U.K. to equip its forces with new missiles, as opposed to the option (b.) to purchase older missiles from U.S. inventory. In either of these options the U.S.

force would be phasing out concurrently with introduction of the C-4 system for the U.K.

2. (S) For option b., the U.K. funding profile is estimated as follows (\$ in millions):

<u>In Process</u>	<u>4/81</u>	<u>4/82</u>	<u>TOTAL</u>
24.6*	4.2**	2.5**	31.3

\* Assumes returns from contract terminations.

\*\* Reflects advance procurement of MK-4 reentry body materials.

Based on a U.S. D-5 IOC of CY 1989 and a U.K. C-4 IOC of 1992, current projections indicate excess U.S. missile and guidance assets can be used to meet U.K. requirements at the time of U.K. deployment. It should be recognized that the feasibility of this option and the availability of U.S. assets is schedule-dependent. While this option has the advantage of avoidance of near term costs, U.K. missiles would not be new and the U.K. system would be unique virtually at the beginning of its life. This profile is valid only for an immediate U.S. decision for D-5, and until that D-5 decision is made, the U.K. has no option that assures purchase of excess U.S. C-4 assets and must continue to fund production requirements as if a new procurement program were contemplated. Obligation of funds must continue until such time as the U.K. decides to rely on U.S. assets for its program.

~~SECRET~~

3. (U) For option c., the U.K. funding profile is identical to that for option b. It is valid in this instance only for an immediate decision by both the U.S. and the U.K. to proceed with the D-5 missile. Until a U.S. decision is made, the U.K. must continue to obligate funds to retain the C-4 option. The U.K. decision is likely to be later than that of the U.S., and the U.K. must continue to obligate funds until it has requested purchase of D-5 from the U.S. and the U.S. has agreed to sell.

(U) The current agreement with the U.K. provides only for Trident I (C-4) and improvements. It is considered probable that Arms Export and Control Act, Section 36b, notification to the Congress would be necessary to permit sale of the Trident II (D-5) to the United Kingdom.

(U) In general, both the U.S. and the U.K. face a similar dilemma with respect to expenditure of funds that could be avoided by an early D-5 decision as compared to maintaining all three options open through FY 1983. In the process of maintaining all the options, the U.S. must continue to expend funds to provide the necessary C-4 advanced funding and production continuity components should the decision not be made to proceed with a D-5 weapon system. The U.S. commitment to the C4U program, represented by the pending reprogramming action (1415) before the Congress, permits a reduction of \$27.9 million in FY 1981 by reducing Trident I guidance inventory objectives and avoiding certain advance procurement. An early decision by the U.S. to proceed with D-5 development and procurement, such as during the FY 1983 POM and budget process, would permit further cost avoidance in the near term. The later the D-5 decision is made, the more must be spent by both the U.S. and the U.K. to preserve the C4U option. It is estimated that U.S. C-4 procurements costs of \$67 million in FY 1982, \$11 million in FY 1983 and approximately \$477 million in the following four years could be avoided by a D-5 decision prior to the end of FY 1981, plus some prior year returns as contracts are terminated. A decision late in calendar year 1982 would mean the loss of prior year returns and nearly all of the \$67 million in FY 1982. Of course, it must be kept in mind that our commitment to D-5 with a 1989 IOC means a commitment to about \$9 billion in R&D costs (FY 1981 \$'s) in the preceding years plus follow-on procurement costs.

(U) To recap, the upcoming POM 83 process seems to be the right time for us to make a decision on a missile. This timing is consistent with U.K. planning in their missile and submarine programs.

Coordinate with:

Subject: U.S./UK Cooperation on TRIDENT

Reference: SecDef Meeting with UK MOD John Nott, 11 March 1981

Action Required: At today's meetings with the UK MOD and other British defence representatives, the Secretary reaffirmed our commitment that the U.S. will make available to the British whatever TRIDENT missile (C-4 or D-5) that we decided to pursue upon completion of our review. He further agreed that, within the bounds of practicability, we would afford them the fallback of joint use of U.S. storage and rework facilities. Finally, he reaffirmed that we would maintain close contact and exchange at both the policy and technical levels on all procurement and planning issues.

The British noted that they have a near term problem regarding the obligation of funds for the TRIDENT program (they have already made substantial commitment to the program and they face additional decisions in the near future).

Please prepare, for the Secretary's review, a brief memo outlining the requirements of the British defence process which they are facing in the near future regarding the obligation of funds for their TRIDENT program. This memorandum should outline what information they would find helpful, and what we could provide them to help in their budgetary decision process. You are to consult directly with the British SSPO (Mr. Michael Quinlan will ensure that you are provided, through the SSPO, the political and budgetary decision timing information that you need).

Please ensure that the Secretary has this by Friday, 20 March.

SEC DEF CONTR No. 13256

POLICY

OFFICE OF THE UNDER SECRETARY OF DEFENSE

WASHINGTON, D.C. 20301

16 March 1981

MEMORANDUM FOR GENERAL POWELL

SUBJECT: UK Defense Spending

The UK achieved the NATO goal of 3 percent real increase in UK FY 1979/80 (UK fiscal year begins 1 April), and about 5 percent this fiscal year, 1980/81. Next fiscal year, however, when it has to take a £200M cut and may have to deduct a £130M overspend this year, the UK will probably show no real growth in its defense budget. Thereafter, from the reduced base, the UK aims to resume annual real increases in defense expenditures in the region of 3 percent.

The above explains UK statements that real growth this and next fiscal year will increase by about 5 percent, or will increase 8 percent over the three year period beginning in FY 1979/80.

A handwritten signature in dark ink, appearing to be "J. H. Timberlake", written over a circular stamp.

Tornado

(U) The Tornado Multirole Combat Aircraft (MRCA) has been developed by Panavia, a consortium of British Aerospace (42.5%), the German firm, MBB (42.5%) and Aeritalia (15%), formed in March 1969. In July 1976, the UK, Germany and Italy signed an MOU for production of 809 Tornados, which are to begin entering service in the early 1980's.

(U) The Tornado is a twin-engined, two-seat supersonic aircraft with a variable geometry wing that enables it to perform a variety of missions (close air support, interdiction, air superiority, air defense, naval strike, reconnaissance).

(S) The RAF will acquire 385 Tornados (165 of the MK2 Air Defense Variant) and the aircraft will eventually comprise two-thirds of the RAF front line force. The German Air Force has plans to acquire 322. Defense officials of both the UK and Germany have recently reaffirmed their governments' intention to proceed with the full planned procurements, despite substantial cost growth of the program caused by a combination of inflation, management difficulties, labor problems and cost overruns. The fly-away cost is now estimated to be \$18 million and the program cost has adversely affected defense budgets in all three countries.

(U) A Trinational Tornado Training Establishment has been set up at RAF Cottesmore, and began operations in January 1981. At present 40 Tornados are based at Cottesmore for certification of pilots and navigators of all three countries. Weapons training will be conducted separately by nations.

## United States Air Force

SECRETARY OF THE AIR FORCE OFFICE OF INFORMATION WASHINGTON, D.C. 20330

### GENERAL JAMES R. ALLEN

General James R. Allen is deputy commander in chief of the United States European Command, with headquarters at Stuttgart-Vaihingen, Germany. The European Command is the senior U.S. military headquarters in Europe and has operational control over Army, Air Force and Navy elements assigned to the command by the Joint Chiefs of Staff. There are more than 300,000 personnel assigned from all the services. Its area of responsibility extends from Western Europe through the Mediterranean, the Middle East land mass and North Africa.

General Allen was born on Nov. 17, 1925, in Louisville, Ky., and graduated from Louisville Male High School in 1943. He entered the U.S. Military Academy, West Point, N.Y., in 1944, graduated in 1948 with a bachelor of science degree in military engineering and was commissioned a second lieutenant in the U.S. Air Force. In 1965 he received a master of science degree in business administration from The George Washington University. He was presented an honorary doctor of laws degree by the University of Denver in 1975. General Allen graduated from the Army Command and General Staff College in 1960 and the Industrial College of the Armed Forces in 1965.

After graduation from West Point, he attended flying training at Randolph Air Force Base, Texas, and in September 1949 received his pilot wings at Nellis Air Force Base, Nev.

General Allen served with the 18th Fighter Group from September 1949 to June 1951 in the Philippines and Korea where he flew the P-51 and the F-80C aircraft. During the first two months of the Korean War, he flew combat missions as a member of a volunteer squadron with the Republic of Korea Air Force. From June to October 1951 he served as aide to the commander of Fifth Air Force.

He returned to the United States in October 1951 to fly the F-86A aircraft as a member of the 71st Fighter-Interceptor Squadron at Greater Pittsburgh Airport, Pa. In June 1953 he was assigned to the U.S. Military Academy at West Point where he served as company tactical officer. In December 1956 General Allen was assigned to the 53rd Fighter-Day Squadron at Ramstein Air Base, Germany, where he flew the F-100C aircraft as a flight commander. He subsequently became a squadron operations officer.

In February 1958 he was transferred to the Directorate of Plans, Headquarters United States Air Forces in Europe. He returned to the United States in 1959 to attend the Army Command and General Staff College at Fort Leavenworth, Kan., and was assigned the following year to the Directorate of Plans, Headquarters U.S. Air Force, Washington, D.C. In August 1964 he entered the Industrial College of the Armed Forces at Fort Lesley J. McNair, Washington, D.C.

OVER

(Current as of August 1979)

In July 1965 General Allen was transferred to Eglin Air Force Base, Fla., where he activated and commanded the 4th Tactical Fighter Squadron. After a brief period in this assignment, he went to Cam Ranh Bay Air Base in the Republic of Vietnam where he flew the F-4C aircraft as deputy commander for operations of the 12th Tactical Fighter Wing. In December 1966 he became the deputy commander for operations of the 3615th Pilot Training Wing at Craig Air Force Base, Ala.

General Allen returned to Headquarters U.S. Air Force in August 1968 as assistant deputy director of plans and in August 1969 became deputy director for plans and policy in the Office of the Deputy Chief of Staff, Plans and Operations. In January 1972 he assumed command of the 19th Air Division at Carswell Air Force Base, Texas.

In August 1972 General Allen became assistant deputy chief of staff for operations, Strategic Air Command, with headquarters at Offutt Air Force Base, Neb., moving up to deputy chief of staff for operations six months later. He became chief of staff for SAC headquarters in September 1973. He returned to Headquarters U.S. Air Force in January 1974 as special assistant to the Air Force chief of staff.

General Allen became superintendent of the U.S. Air Force Academy, Colo., in August 1974 and chief of staff, Supreme Headquarters Allied Powers Europe, Belgium, in July 1977. He assumed his present position on July 1, 1979.

He is a command pilot and has flown the AT-6, P-51, F-80C, F-86A, F-100C, F-4C, T-37, T-38, B-52 and KC-135 aircraft. His military decorations and awards include the Defense Distinguished Service Medal, Distinguished Service Medal with one oak leaf cluster, Legion of Merit with two oak leaf clusters, Distinguished Flying Cross with one oak leaf cluster, Bronze Star Medal, Air Medal with 11 oak leaf clusters, Air Force Commendation Medal with one oak leaf cluster, Army Commendation Medal, Air Force Outstanding Unit Award ribbon with three oak leaf clusters and "V" device, and Republic of Korea Presidential Unit Citation. In February 1979 the government of France awarded General Allen the French National Order of Merit in the rank of commander.

He assumed the grade of general on July 13, 1977, with date of rank Aug. 1, 1977.

General Allen and his wife, the former Kathryn Lewis of Indianapolis, have two children, Jeffrey and Kathryn.
