

## DEPARTMENT OF STATE: OFFICE OF THE HISTORIAN: Records, 1981-1989

### **OFFICE DESCRIPTION**

The Department of State is the senior executive department of the United States Government. It was established by (1 Stat. 28) act on July 27, 1789 as the Department of Foreign Affairs and was renamed the Department of State by (1 Stat. 68) on September 15, 1789. The duties of the Department of State in the field of foreign affairs have not changed significantly in scope since the early years of the United States but have become far more detailed as the country has grown and its international commitments have multiplied.

The Department of State advises the President in the formulation and execution of foreign policy. As Chief Executive, the President has overall responsibility for the foreign policy of the United States. The primary objective of the Department of State in the conduct of foreign relations is to promote the long-range security and well-being of the United States. The Department determines and analyzes the facts relating to American overseas interests, makes recommendations on policy and future action, and takes the necessary steps to carry out established policy. In carrying out these functions, the Department engages in continuous consultations with the American public, the Congress, other United States departments and agencies, and foreign governments. The Department of State negotiates treaties and agreements with foreign nations, speaks for the United States in the United Nations, and in the major international organizations in which the United States participates. The Department of State represents the United States at international conferences annually.

The Office of the Historian is an office of the United States Department of State, within the Bureau of Public Affairs. The office is responsible for the preparation and publication of the official historical documentary record of U.S. foreign policy in the *Foreign Relations of the United States* or (*FRUS*) series. It also researches and writes historical studies on aspects of U.S. diplomacy for use by policymakers in the Department and in other agencies, as well for the public.
