Material noted in bold within this collection is currently available for research use. If a folder is available for research use it may still have withdrawn material due to Freedom of Information Act restrictions. Most frequent withdrawn material is national security classified material, personal privacy, protection of the President, etc. Any non-bolded folder is closed for research.

The non-bolded folders are subject to Freedom of Information Act (FOIA) requests under the provisions of the Presidential Records Act (PRA).

If you are interested in submitting a FOIA request for access to any of the unavailable records or have any questions about these collections or series, please contact our archival staff at 1-800-410-8354, outside the US at 1-805-577-4012, or email reagan.library@nara.gov

BOGGS, DANNY J.: Files, 1981-1984

Office of Policy Development: Senior Policy Advisor (1981-1982); Assistant Director and Special Assistant to the President (1982-1983)

Danny J. Boggs had the “energy” portfolio within the Office of Policy Development. This grew to include Department of Energy reorganization efforts, natural resources, agriculture, and science and technology issues. His personal interest was in biomedical engineering and gene splicing.

Boggs basically created his own filing series and the Library has maintained this original order. He grouped subjects by energy, natural resources, agriculture, the environment, working groups, global issues, and the National Aeronautics & Space Administration. His collection included administrative material which has been divided up into a group of series starting with Series VIII: Memoranda. Boggs also had odd subjects which did not fit his devised subject series, and we have put these largely in the Administrative series. Most of them involved responding to a request from Edwin Harper, the Assistant to the President for Policy Development, and usually involved working across White House and agency offices.

Finally Boggs retained material he worked with or created within the Office of the President-Elect, 1980. We have placed this as the last series in this collection as it is not a presidential record. The material can be substantive, especially for how the Reagan Administration began energy policy from the first days of the Administration.

See also OA 12582 in the Randall Davis collection for Cabinet Council on Natural Resources and the Environment (CCNRE) meeting notes created by Boggs, but used by Davis.

IX: Administrative; SERIES X: Appointments & Scheduling; SERIE XI: Trip File; SERIES XII: Chronological File; SERIES XIII: Phone Logs; and SERIES XIV: President-elect Transition Material.
